

At Ocean Blue Hotel, we share below the accessibility facilities and current limitations of our hotel so that our guests can plan their stay according to their needs.

### Parking, entrance and common areas

---

There is a reserved and marked parking area for guests with disabilities. Access from the car park to the entrance is via a step-free path with an even surface. The clear passage width of the main entrance door is **2 metres**.

The reception has an arrangement that makes it easier for wheelchair users to complete their check-in; the lobby offers manoeuvring space and seating. A lift is available between floors. Stairs have handrails on both sides and markings on the step edges.

### Accessible room

---

Our hotel has **1 accessible room (room 2101)**. Its bathroom has a step-free shower, grab bars and a shower seat. There is space beside the bed suitable for approach by wheelchair. Please confirm the room's availability and the suitability of its features for your needs before booking. Photos of the room are provided on page 3.

### Food and beverage, information and staff support

---

Wheelchair access to the buffet and staff assistance on request are available. Directional signs are legible and in contrasting colours. Large-print or digital options are available for menus and information. Our staff have been briefed on communicating with guests with disabilities. An emergency evacuation plan and assigned staff are in place for guests with reduced mobility.

### Ramps within the hotel

---

The **four ramp locations** (passage from reception to the rooms, restaurant passage on the second floor, Sun Bar and next to the Sun Bar WC) are shown on the map on page two with the markers **R1–R4**. Reported ramp lengths range from **163–480 cm** and the height differences overcome range from **50–105 cm**. The measurements for each point are given in the table below the map. We recommend confirming that the passage width and conditions of use suit your needs before booking.

### Current limitations

---

There are no audible announcements or tactile buttons in the lift, no special light alarm or alert system for guests with hearing impairments in the rooms, and no accessible toilet in the common areas.

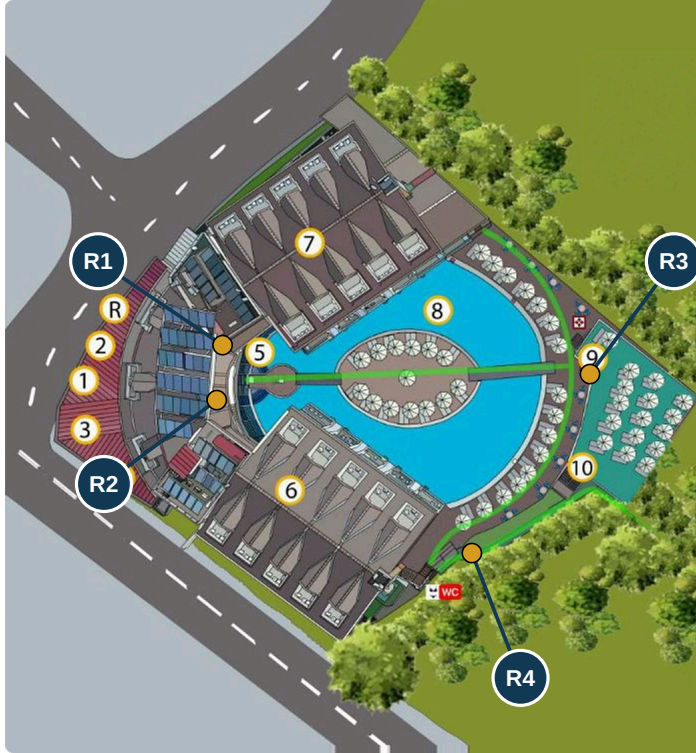

### Information before booking

---

We recommend obtaining information before booking about the door widths of rooms and bathrooms, lift dimensions, access conditions of the restaurant and bar areas, garden paths, and the pool and spa facilities. Please also discuss any request to stay with a guide dog with our hotel management in advance. Sharing your needs in advance will help us assess together whether our hotel is suitable for you.

## Hotel Map and Ramp Locations

The R1-R4 markers show the four ramp locations within the hotel. Floor levels and measurements are given in the table below.

### Map legend

- R Reception
- 1 Main entrance
- 2 Breakfast restaurant (2nd floor)
- 3 Tia Lobby Bar
- 4 Mr. Chef A La Carte Restaurant (2nd floor)
- 5 Spa and Turkish bath (basement floor)
- 6 Ölüdeniz (rooms 1101-1410)
- 7 Fethiye (rooms 2101-2310)
- 8 Main pool
- 9 Sun Bar, snacks and drinks
- 10 Sunbathing terrace
- WC WC, shower and changing cabin
- E Emergency assembly point
- Walking paths

### Ramp locations and measurements

| Marker | Location                        | Floor / level | Ramp length | Height difference |
|--------|---------------------------------|---------------|-------------|-------------------|
| R1     | Passage from reception to rooms | Ground floor  | 163 cm      | 50 cm             |
| R2     | Restaurant passage              | 2nd floor     | 378 cm      | 105 cm            |
| R3     | Sun Bar                         | Ground floor  | 357 cm      | 81 cm             |
| R4     | Next to the Sun Bar WC          | Ground floor  | 480 cm      | 72 cm             |

Ramp length is the value along the sloped edge in the measurement drawings. Height difference is the vertical distance between the lower and upper levels. Passage widths are not specified; please confirm suitability for your needs before booking.

## Accessible Room (2101) Photos

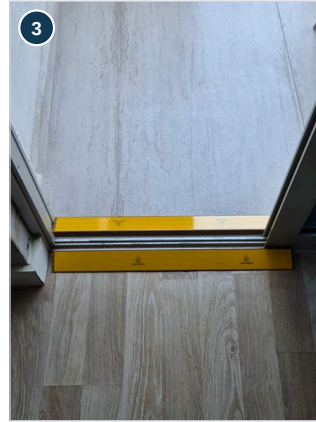

The photos below show accessible room 2101 and its bathroom.

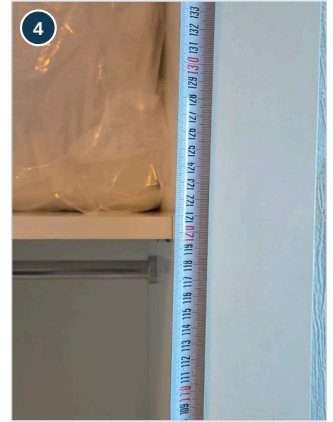

Room entrance: accessibility sign, key-card lock and lever handle

Wheelchair passage through the balcony door

Yellow threshold ramps at the balcony door
